

# Chirokinetic Therapy (CKT) – A Brief History

CKT was developed by David Stevens in 1997. The primary aim was to seek a successful treatment for allergies.

This has been achieved, with remarkable results in a wide range of allergic reactions, including anaphylaxis.

The first person to be treated with CKT for anaphylactic shock reaction to peanuts is still allergy free 10 years on.

On discovering the beneficial effects of CKT, David began working on other ailments and CKT now successfully deals with a broad range of health issues.

CKT enables practitioners to help their patients in many ways and really can open the door to the healing power that is within each and every one of us.

The course is set in 3 Modules, the first being over 4 days.

All 3 modules need to be completed to qualify as a CKT practitioner and to have your details on the CKT website

## Module One

Clinical Evaluation, CVI, Typology, Basic Iris Diagnosis, Pulse  
Cranial Mapping. Basic Organ and System Testing  
Testing for Food and External Allergens  
Testing for Vaccine and Virus issues  
Supportive Techniques  
Learning and Practicing a CKT Treatment.

## Module Two

Expanding on Module One  
Advanced Organ & System Testing  
Structural and Physiological Evaluation  
Identifying Patterns and Pathways  
Testing and Treating Emotional Connections  
Using a Surrogate for Treatment

## Module Three

Expanding on Module Two  
Testing for Self limiting Beliefs  
Looking at Spiritual Vows and Karmic Links  
Negative Attachments  
Sending a Distant Treatment  
Using Symbols to Enhance a Treatment  
Final evaluation – Certificate Presentation

“My first case study was a 74 year old lady with ME, so weak and lacking in vitality that I could barely test her. The change in her has been remarkable, I am so glad I learned CKT and so is she!” **Iain Stevens**

“During the course, one of my first case studies was a long term eczema sufferer. I was astounded when I saw her a second time, her skin was completely clear – we were both amazed!” **John Langdale**

“I have never been more excited about anything I have ever done in my entire life, Chirokinetics is a life changing experience.” **Julie Bedford**

“It is no exaggeration to say that this treatment has changed my life. Now I regularly eat products containing peanuts without experiencing any symptoms whatsoever.” **Karl Richards**

“This really works! After just three treatments my 3 year old son is completely clear of eczema.” **Becky Larham**

“The day after treatment, I noticed my energy levels had increased and I had a spring in my step. The stomach pain I’d had for most of my life was gone. Chirokinetics has changed my life.” **Alison Russell**

“Sneezing, a blocked nose and runny eyes were regular problems and I was given inhalers and other drugs over the years. One summer, I broke out in eczema with scabs all over my body and I decided it was time for an allergy test. Using CKT David Stevens did extensive tests and found that I was allergic to numerous things. I expected to be sent away with a list of foods I couldn’t eat, but I wasn’t! Virtually overnight there was a difference. I could eat whatever I liked and I didn’t get hay fever.” **Peter Dunne**
